

² DE-N-311 Arun River at confluence of
Num and Kokta khols
1 hr downhill east and upstream from Num
(Sankhuwasabha district), Nepal
just upstream from bridge to Gari

15 Aug 96

1030-1400

N 27° 33.08'

E 87° 18.07'

1597 ± 308'

30 Nov, 182'

10 Schizothorax richardsoni (?)

(bucche asla)

tissue samples 311-1 → 311-10

muscle in EtOH

gill in DMSO

photos (2)

specimens tagged & preserved 1-10

also, Psilorhynchus pseudocheneis photos

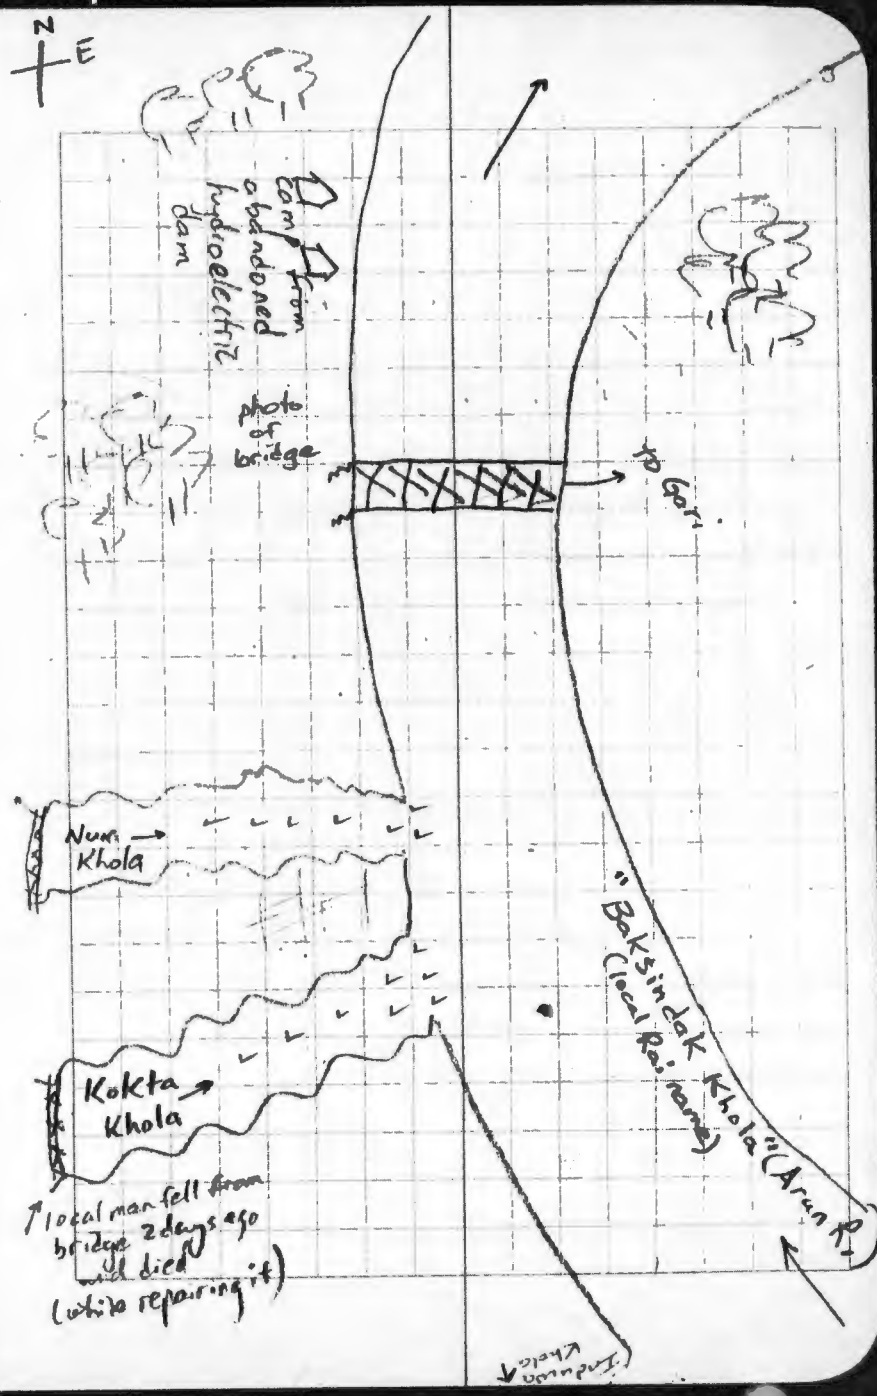

Neolissocheilus hex photo

Nemacheilus beawani photo

3 odonates, 1 frog, 2 tadpoles

40 casts cast nets, 3 hauls, 10 kicks
small gill net set for 1 hr --- no fish

collectors: Eds, AB, Gurung, Purna, Dhan

P. pseudocheneis seems to inhabit part of niche of Kali Gandaki's Euchiloglanis hodgarti.

N. beavani instead of N. rupecola but shoved (?) into a sand and sand/gravel habitat (by P. pseudocheneis?). Few beavani in rocky r.f.f.s. Most found in sand and sand/gravel.

Locals say Kabre can be caught here also. KGR locals say the same for some upstream areas in that river. (Pseudocheneis sulcatus).

Locals had dynamited stream a few days ago. A large (ca 400 g) cattle decomposing on bottom of pool.
